Subject: LEAVE THE LAKE LEVEL ALONE

All I can offer you is the hard, simple truth....

In my opinion there is no other reason to raise Lake Ontario's water levels then to benefit Canadian shipping and to build Hydro-electric power plants. If the lake is polluted it is because of industry and run off from farms and roads. Can't you see that you would be adding to the problem. Flooding the shoreline would put endless debris and septic pollution in the water. You could find ways to solve these issues without destroying the property of tax paying lake shore property owners.

If you raise the lake lever you will.....cause billions of dollars of damage to property owners, destroy the town of Sodus Point, Sodus Bay, Little Sodus Bay, Duck Bay, light houses and harbors, historical areas and buildings, ALL THE BARRIER BARS AND BEACHES along the south Lake Ontario shoreline, businesses, and that is just in our area. The loss of tax revenue will be enormous. Don't forget there are two nuclear power plants right along the shoreline. In the long run the lake will be in a worst state then before you raise the lake water level. You will be causing more problems on top of the ones that already exist.

It is a fact that if left alone the environment does a better job of cleaning itself then men can do to solve it's problems. It is sad to see our forest burning down because people were not allowed to go in and clean up the dead wood and selectively cut trees. It is also a shame to see the damage men have cause by damming our rivers and streams. More harm has been done then good.

It is also a fact that the planners of the St. Lawrence seaway signed an agreement many years ago promising they would do no harm to the shoreline.

DO NO HARM TO THE ENVIRONMENT, LEAVE THE LAKE ALONE.....PLEASE,

comments from a lake shore property owner
