Re: Water Level

The members of the Crescent Beach Association again want to emphasize that the land upon which our homes are built is critical to the integrity of all of Sodus Bay. Increased water levels will threaten that integrity as well as areas of Sodus Point. It will destroy our homes and open the bay to Lake Ontario thus eroding the land now protected by our sandbar.

We refer you to the attached letter sent approximately a year ago stating our position that Plans A, B, and D are not acceptable. Our membership once again asks that you save our homes.

We respectfully request that the status quo be maintained and 1958 DD be continued.

Sincerely,

Joseph S. Corsica, Jr., President
Crescent Beach Association
