September 14, 2006

Dear Secretary:

I have studied the proposed water level management plans and I am deeply concerned. Any plan that allows higher fluctuations or lower levels than we have seen in the past 35 years of our operation would be very detrimental to our business and the quality of life that is enjoyed by thousands of our boating customers. We have already spent in excess of \$1,000,000 in dredging costs to mitigate low water level problems – we cannot afford more.

In the interest in our continued survival and our capacity to serve the boating public, we put our support behind Plan A+.

Yours truly,

Hub Steenbakkers  
Collins Bay Marina
