Mr. Greg McGillis
Public Affairs Officer
International Joint Commission

Ottawa, ON

Dear Mr. McGillis:

We are happy to report that the levels of Lake Ontario are beginning to recede. We believe this to be, in no small part, due to the efforts of your people in letting out the maximum water and the co-operation of "Mother Nature" in less rain fall than we anticipated. This past week it appears that the water has dropped between 1-2 inches, which is good news at this time in May. There have been instances when the water levels have continued to rise until the middle of June.

Appreciate your efforts.

Yours very truly,

Eben James
