

May 22, 2000

To whom it may concern,

Our environment is very important to my family and I because my husband and I love to take our 6 children camping and swimming. Last year was horrible there was dead fish everywhere. If our environment keeps getting worse what will happen in the future!?! I want my children to grow up with a beautiful environment. We need to start now before it is too late.

Thank you for taking the time to read my letter.
