

May 23, 2008

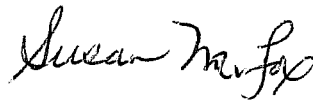

Dear Sir,

As a citizen who has lived more than fifty years of her life next to Lake Ontario I would like to urge you to support the findings of the International Joint Commission to implement a water management plan. I have seen the changes that have occurred due to the change of water levels caused by the regulation of the St. Lawrence River and Lake Ontario.

Please help us protect the Upstate New York economy and environment by urging the IJC and the U.S. Department of State to adopt a firm deadline to implement Plan B+. Plan B+ will create a healthier environment and benefit a majority of the users of the lake and river, including fishermen, recreational boaters, hydropower, and municipal water users.

Your support of this plan will help to provide for future generations who will have access to the wonderful waterways of Upstate New York.

Sincerely,

Susan M. Fox

Oswego, New York
