

FRANK BEVAGUA
Public Information Officer

5/23/08

Dear Mr. Bevagua

I am very concerned about the environment in which we live, specifically Lake Ontario. I have relocated to Central NY and was very surprised to learn we could not use this lake for fishing + recreation with my family due to pollution. I am hoping that you will support this area + lake by adopting and implementing the Plan B + initiatives so that this vital ecosystem will be protected years into the future. Please respond to my pleas as a private citizen on this very huge issue.
