Washington D.C. 20440

Mr. Bevacqua-

I am writing in an attempt to persuade you to adopt a firm deadline to implement the B+ plan being organized by the Citizens Campaign for the Environment. As a resident of a community located on the shores of Lake Ontario, I feel that it is important to protect the environment throughout the Great Lakes and St. Lawrence River areas in order to preserve fresh water supplies and support both the local fishing industry and recreational boating activities. Additionally, any effort that can be made to support clean and renewable energy production, such as harnessing the power of the Great Lakes and the St. Lawrence River to increase hydropower energy production, is a step in the right direction.

I am requesting that you respond to this letter in writing and that you provide me with information regarding the steps that your office is taking in order to support initiatives designed to protect and support both the St. Lawrence River and the Great Lakes.

Thank you.

Christopher Tynan

Oswego, NY 13
