

Dear Mr. Bevacqua:

5-28-2008

I am writing in regards to adopt the Plan B+ for a cleaner, healthier environment involving the St. Lawrence River and Lake Ontario.

It is important to have plenty of clean water for the wildlife and plant life.

It is necessary to prevent the reduction of the water levels, which causes erosion of the shore lines.

It is important to protect our environment for the future of our children to enjoy for years to come.

Please put in place the Plan B+ to help manage our Great Lake and River.

Sincerely,

Barbara McKnight

Rochester, NY
