RECEIVED-IJC
INT'L JOINT COMMISSION
2008 JUN 11 P 4: 36

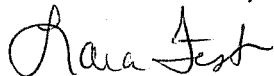

Dear Mr. Frank Bevacqua:

We just wanted to let you know how important it is to our family to have the Great Lakes and rivers of New York State healthy and clean. In our experience over the years, there are many foreign species introduced to our water, ex. Zebra Mussels, Gobie Fish and Cormerands. We have seen the distructive result of these species being introduced to our water whether on purpose or by accident. More importantly we need to strive to keep our waters clean and we feel that bring in foreign things whether it is pollution or species is damaging our lakes and waters.

Our family urges you to protect the Upstate economy and environment by adopting a firm deadline to implement Plan B+. Could you please respond.

Sincerely,

Lara Festa and Family

Rochester, NY
