Dear Mr. Bevacqua,

I am writing this letter to ask for you to protect the Upstate New York economy and environment by adopting a firm deadline to implement Plan B+. My family and I have grown up enjoying all that Lake Ontario and the St. Lawrence River have to offer in terms of recreation and relaxation, and I want to ensure that this unique asset to our region continues to exist in a way that future generations may enjoy as I have. You can do your part to ensure this occurs by adopting an environmentally sustainable plan that allows more natural water levels, improved environmental conditions, and maintains benefits to hydropower. Specifically, I am asking you to adopt a firm deadline to implement Plan B+.

Thank you for your anticipated support.

Sincerely,

Michelle Stodd

Rochester, NY
