

Having a healthy Lake Ontario and St. Lawrence River is very important to my family. Me and my go every year to

the St. Lawrence River to fish. Knowing that the environment is being protected and the fish are healthy, pollution

free. The landscape should stay beautiful so my son can enjoy the wildlife and scenery. It's important to not forget

the beauty that lies there. The Great Lake of Ontario should also be protected so everyone can enjoy a polluted

free environment. Please protect our waters .
