Dear Mr. Bevacqua,

I am writing this letter to express my interest in a healthy Lake Ontario and St. Lawrence River. Please implement the B+ Plan so that our water is protected and preserved. Rivers and lakes can start becoming healthier once this B+ Plan is implemented. Keeping the lake and river healthy now can provide a higher and cleaner water supply for everyone. I am asking if you could take in consideration our health and the health and prosperity of the natural habitat that use these resources.

Could you please respond to my concerns in writing? I would really appreciate your deepest concern to this matter.

Thank You,

Franzetta A. Redd

Watertown, NY
