INT'L JOINT COMMISSION
2008 JUN 11 P 4:42

Dear Mr. Bevaqua,

I think it is important to have rivers and lakes because if we didn't where would half the animals in the world live? If the animals didn't have a place to live a lot of those animals would die. If all those animals died some of those species would become extinct or endangered. Also we would never find out what some of the interesting animals are. Please help our environment by adopting a firm deadline to implement Plan B+. Please help to save Lake Ontario and the St. Lawrence River. I think even the smallest animals make a difference. I think we need to stop and not do this because every second a part of a rainforest the size of a baseball field gets cut down.

So, if you think about it, please make your choice be no. Also think about it if you you want the animals to get hurt or endangered you're making the wrong choice! Let's think about this, think of all us curious kids who want to learn more! So please, please pick the anwser no to wrecking lakes and wetlands!!!!

Sincerely,
Emma Sens
Fourth Grader
