

Dear Mr. Bevacqua,

RECEIVED-IJC  
INT'L JOINT COMMISSION

2008 JUN 11 P 4: 34  
I understand that there is alot going on in this country that takes up your time. However an issue has crossed itself that close disress your attention. Lake Ontario has become poluted and in certain areas, completely un-sitary. I have grown up on the lake and its current condition is unacceptable. Of all the money that is spent for research, and development of reduction of Carbon emissions, some funding to presere our lake environment is reasonable. The B+ Plan needs to be implemented and a FIRM deadline needs to be set. I know how busy you must be, but this issue is a true concern that your attention can solve quickly.

Thank you for your time  
Matt McGuire

Rochester N.Y.

PS Please send me a response to this letter, @ Thankya again for your time.
