2401 Pennsylvania Ave, N.W.  
Fourth Floor  
Washington, D.C. 20440

Dear Mr. Bevacqua:

The unnatural water regulations of the past fifty years have caused serious environmental problems along Lake Ontario as well as the other Great Lakes.

More natural varied water levels have a direct positive impact on fish, birds, water quality, hydropower & human life.

Lake Ontario's ecosystem has sustained consistent losses of vital wetlands.

I wholeheartedly support the IJC Plan B+ which would benefit fish, wildlife, ship navigation & clean hydropower production. It would allow more natural water levels. A sustainable ecosystem

would return to Lake Ontario,

I urge the International Joint Commission to implement Plan B+.

I would like to know the date that the plan will be implemented as well as which plan the Commission decides to implement. Please send a written reply.

Sincerely,  
Meredith J. Sorensen

P.S. Our well-being waterwise depends upon healthy Great Lakes.
