June 17/08

Dear Mr. Bevacqua:

It is of great interest and concern that I write this letter urging you to adopt a firm deadline to implement Plan B+. This will create an sustainable ecosystem for Lake Ontario and the St.Lawrence River.

As a resident of Canandaigua, N.Y. and living next to Canandaigua Lake, we do not use any herbicides or pesticides on our garden or lawns. We compost all left over vegetables, cut shrubs etc. in order to naturally have clean earth to add to our garden. We also recycle all accepted products. Therefore, as you can see we are doing our small part in protecting the environment and our surrounding ecosystem.

It is time for the Government to help with the bigger picture.

Yours truly,

Joanne Adam
