Fourth floor
Washington, DC 20490

Being that I consider myself a rather "active" young nineteen year old, I feel encouraged to write this letter addressing "Plan B+" in support of not only a natural and healthy ecosystem for Lake Ontario and the St. Lawrence River, but a healthy ecosystem for the surrounding regions. Because I believe that promoting a healthier, more natural state in the lakes and rivers will substantially increase the vitality of the surrounding environment. It is important that organizations such as the Citizens Campaign are heard and furthermore recognized as their problems and solutions are heard by the citizens of these

areas and surrounding countries.
to whom these matters matter
most.

It would seem to me that
converting to more natural methods
would not only be a cheaper
solution to these problems, but
more importantly a long term
way to save money while getting
it to other places that perhaps
could be more effective immediately
and more fruitful in the long run.

I sincerely hope that someone
will step up and take charge in
leading the New World.

Sincerely Active

Nicholas Daniel Chiosa
