RECEIVED-IJC

INTL. JOINT COMMISSION

2008 JUN 21

To: Condoleezza Rice, Secretary of State
Frank Bovaquas, Information Officer
International Joint Commission, U.S. Section

We do support the healthy Lake Ontario and St. Lawrence Ecosystem B+ Plan. We must protect the fresh water that we have in the Great Lakes and preserve swimming, fishing and recreational boating in this area. Water level must be managed to protect vital wet lands, various species of fish and nesting water birds, including loons. We also need to maintain the commercial boating capabilities of the St. Lawrence Seaway and to enable the power plants to generate more electricity.

We would appreciate knowing your reaction to our concerns.

Yours truly,
Diane L. Wright
