

6/22/08

Dear Frank Bevacqua

I am writing to urge you adopt a firm deadline to implement Plan B⁺ to protect Upstate NY's economy and environment.

I feel fortunate to live in an area with such beautiful natural bodies of water, however, it is being wasted due to the quality of the water. It would truly benefit everyone in this community to implement Plan B⁺ and clean up the water. I do not feel safe to let my children swim in Lake Ontario and it is a shame because they should be able to enjoy what is here.

Please consider cleaning up our water and implement Plan B⁺. I would appreciate a written response to my concerns. Thank you!

Sincerely

Pam Suttera

Rochester, NY
