

24 June 2008

Mr. Beracqua,

Having grown up in the watershed of one of the Great Lakes, I know first hand what a boon it is to the populace, and the environment. Having travelled around the US and the rest of the world, I know ~~what~~ what a treasure it really is.

I strongly support a healthy and sustainable water level management plan, and feel that a defined deadline for implementation of the B+ plan would provide a significant benefit for the majority of those affected.

Sincerely,

Douglas Brainard
