June 24th, 2008

Dear Mr. Bevacqua,

Passing Plan B+ is the perfect solution in creating a healthier environment for the Great Lakes and surrounding rivers, in particular, Lake Ontario and the St. Lawrence River in Upstate New York. Users of the lakes and rivers are also affected, such as fishermen, recreational boaters, and hydropower/municipal water users.

Plan B+ will offer a way to restore the natural cycle of the lake(s) as well as increasing the use of hydropower generation, which will in turn increase revenue. Passing Plan B+ is a win-win situation. It allows for the conservation of Lake Ontario and major neighboring rivers. On the other hand, passing this will also increase revenue by the millions each year from more hydropower generation. Overall, Plan B+ is the best choice for the environment and the economy.

Thank you for your time and consideration!

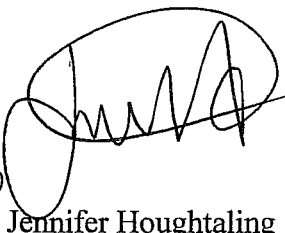

Sincerely,

Michelle Houghtaling
