I am writing to you to ask that you support the B+ Plan that would create a sustainable ecosystem for the Lake Ontario and St. Lawrence Rivers. I also ask that you adapt a firm deadline to implement the Plan!

The decades of artificially controlled water levels has damaged the environment by eliminating significant habitat for the fish and wildlife. We need a plan that will balance commercial navigation, recreational boating and hydropower. We have a camp on the St. Lawrence River and see the negative impact decades of the artificial control of the waters has caused.

Please support B+ Plan and adapt a definite deadline to implement it. I look forward to a response from you.

Robin Davis

Canandaigua, NY 1

A handwritten signature in cursive script, appearing to read "Robin Davis".
