

To: Frank Bevacqua

My family and I travel all over New York state to camp. We enjoy swimming and boating in our great lakes and rivers we camp near. We love to fish and watch the birds fly over the water.

I have seen fish die off and people get ill from some of our waters. I have fished all over New York State in Walleye tournaments and have run into parts that were to shallow to boat in.

I have witnessed the amount of fish in our lakes and rivers decline. What once were great places to fish no longer hold the fish they once did.

The wildlife in our area need fresh water to survive and I have seen water unfit to drink. I have enjoyed our lakes and rivers for many years and would like for my children to be able to do the same.

Please help us protect upstate New Yorks economy and our environment. Adopt a firm deadline to implement Plan B+.

Thank You

Shannon Jason
