

July 7, 2008

The International Joint Commission
1250 23rd Street
NW Suite 100
Washington, D. C. 20440

I am an owner of a summer residence on Lake Ontario at Ramona Beach, Town of Richland in Oswego County, New York that has been in my family since it's construction in 1929.

My wife and I are very concerned about the proposal of adoption of the Plan 2007 B~~X~~ which would cause severe damage in storms at the proposed high level. Although the current regulations has created some erosion and damage in severe storms, the suggested 2007 proposal would be acceptable with provisions for mitigation of damage, The 2007B~~X~~ would have serious consequences.

Thank you for your consideration.
