Dear Mr. Bevacqua:

As a concerned resident of Upstate New York, I highly support a healthy Lake Ontario and St. Lawrence River ecosystem. I request a firm deadline in the B+ Plan to better maintain a natural, and very beneficial, state of environment for me and my fellow citizens. So that we may all enjoy nature's beauty and diversity to the fullest, with this plan we can maintain economic stability and keep our Lake's safe. With more and more biological diversity being eliminated in my area, I am deeply concerned with the health of the ecosystem. Without our wetlands many species of fish and other species are dying off because of an unstable program to regulate water levels. With Plan B+ we can regulate them at a more stable rate, and still maintain our economic benefits. Also, the use of hydropower will still be intact and still greatly beneficial with this plan. Our ecosystem affects us in many aspects, and without it, we will be greatly deprived and be at a severe loss. Please support this cause, and request an immediate deadline to the B+ Plan.

I thank you for your consideration.

Sincerely,

Jerry Browning

Liverpool, NY
