

Kells: A line near the south shore of Lake Ontario. I have seen the damage of many friends and relatives waterfront property due to lake levels. I also know many people on the St Lawrence River. I went to fish this spring near Ogdensburg and 90% of the docks were under water! The rest were stacked with debris, weeds, logs, dead fish, and everything else that floats.

If you feel this Bill will really help, and will by no means lead to the sale of our water to private corporations, PASS IT!

I am a duck hunter & strong supporter of Ducks Unlimited (Committee member). I also own three boats from 12'-22'. I own enough fishing and boating and hunting gear to stock Bass Pro Shops.

We have tried to control mother nature before elsewhere and it has not worked. Anyone who sees the flooding over the years knows that again if people think PRAWBt will work set the deadline and pass it.

over -

I only hope this is not just another way
to TAX and RESTRICT boaters and homeowners
and a stepping stone to the sale of our
waters!

On another note I ~~do~~ now have a \$20
user fee added to all my NY STATE REGISTRATION

2 TRUCKS	40
1 CARR	20
2 TRAILERS	40
3 BOATS	60
	<hr/>
	\$100

and if it goes the way I think, I will have
the bilge fee to pay soon. It will be
OK to drain my huge hulls (as long as I
pay a fee - please) And lets not forget
fuel.

As I see it in five years I can sit
home all vacation and when I retire (I'm 54)
and watch my old videos and look out the
window at my boats. What fun. I keep forgetting
that has been the plan of the Globalists and
the NWO freaks as long as I have lived.
