

Mr. Frank Bevacqua,

Hello, My name is Jason M. Lauer and I live in Onondaga County New York. I'm writing to you on behalf of my Family and myself about the International Joint Commission's Plan B+. I'm sure you have received other letters concerning this plan as it is a means to create a healthier environment and ecosystem beneficial to those of us in Lake Ontario's surrounding counties that enjoy the recreational benefits of a healthy environment and more importantly the quality of the water that we consume, bathe, and relax in that is delivered to us. I completely support plan B+ and I strongly encourage you to adopt a firm deadline to protect the local economy and environment before it is too late. Already, the economy in the area is slowly deteriorating and the fishing/watersports aren't as productive as they once were. With the Economy itself being so poor and the prices to travel soar, many people rely on the local area lakes as a place to vacation and spend money. Think of all the fisherman that would drive back to Lake Ontario, or the people that would rent the charters just because re-introduction of species of wildlife and fish. It may not seem like alot, but when thousands of people flock to our Great Lake, they spend money locally, as in New York, and that gives our economy just a little boost and in turn generates more tax dollars for other improvements. More Money in Local Hotels, B&Bs, Restaurants, Stores, Supply Shops, Gas Stations, etc. Please Help us recover from the damage we have so inadvertantly created as we progress and make this area just a little bit better for our future generations. Thank You for your time as it is sincerely appreciated.

Jason M. Lauer  
Baldwinsville N.Y.
