

Conservation Alliance of New York

As a stakeholder, along with The Nature conservancy, Save the River, Ducks Unlimited and Audubon New York, we would like to support the Plan B+ for the St. Lawrence River and Lake Ontario.

We feel a more natural approach to the water levels and preservation of natural environment will far more enhance the habitat of fish, muskrats and all other wildlife that make this area their home.. An unbroken chain is the key to all inhabitants, people as well as wildlife.

We applaud the State of New York, the Ontario Ministry of Natural Resources, and other federal and state/provincial agencies,, private organizations and stakeholders in the U.S. and Canada. We feel this plan would promote a healthier economy for a large region, not just the immediate area.

Thank you for this opportunity to participate in the history of the mighty St. Lawrence River and Lake Ontario.
