**I support Plan B+ for the following reasons. Restoring the natural cycles of the lake & river will help to save Marshes, Dunes and other wetlands necessary for habitat for birds, fish, plants, mammals and other species. Marshes & Dunes play an important role in Protecting shoreline from storms, holding soil erosion Down, help with water quality and in some cases to Filtering sewage. These plans will the help the economy by producing more fish, birds and game for hunting.**

**Shipping & Hydropower will improve because of better Water levels. The most important reason it will help us All by providing less stress in our life's.**
