Subject: Correction to recent publication

In reading the recently posted EPA publication "2002 U.S. - Canada Progress Report" focused on acid rain, ozone and other transboundary air quality cooperation, I noticed an error on page 35. The NEG/ECP Forest Mapping Project published a protocol document in 2001, not in 1991 as stated in your publication.

"In 1991, a Protocol for Assessing and Mapping Forest Sensitivity to Atmospheric Sulphur and Nitrogen Deposition was developed and published."

This is the web address where I access the document:  
<http://www.epa.gov/airmarkt/usca/2002report.html>.

Thanks.

Sandy Wilmot  
Co-chair, NEG/ECP Forest Mapping Work Group
