Subject: Ontario regulations and the Canada-U.S. Smog Agreement

Right Honourable Herb Gray,

I am writing to you as a citizen of Ontario asking that you recommend to the Government of Canada that it use its authority under the Canadian Environmental Protection Act to bring Ontario's coal-fired power plants into compliance with the Canada-U.S. Smog agreement of 2000.

Ontario has failed to establish regulations to ensure that Ontario's power plants will be in compliance with this agreement and the current regulations will permit the provinces emissions to exceed the agreement by 33% in year 2007.

Thank you,

Steven Paradine
