Subject: Ontario in violation of Smog Agreement

Mr Gray,

My understanding is that Ontario has not taken steps to ensure that its coal-fired power plants are in compliance with a Smog Agreement with the United States. In fact, by 2007, emissions will exceed the regulations by an astonishing 33%.

Will you ensure the Government of Canada uses its authority under the Canadian Environmental Protection Act to bring Ontario's power plants into compliance with the Smog Agreement?

I look forward to your response.
