Mr. D.C. Chance, Secretary,
International Joint Commission,
75 Albert Street,
Ottawa.
should indicate how the various interests on either side of the boundary would be benefited or adversely affected thereby. The Commission should estimate the cost of such changes in existing works or of such other measures and the cost of any remedial works that might be found to be necessary and make an appraisal of the value to the two countries, jointly and separately, of such measures. For the purpose of assisting the Commission in its investigations and otherwise in the performance of its duties under this Reference the two Governments will upon request make available to the Commission the services of engineers and other specially qualified personnel of their governmental agencies and such information and technical data as may have been acquired or as may be acquired by them during the course of the investigation.

The two Governments have agreed that when the Commission's report is received they will consider whether any examination of further measures which might alleviate the problem should be carried out, including extending the scope of the present Reference.

The Commission is requested to submit its report to the two Governments as soon as may be practicable.

Yours sincerely,

(signed) Paul Martin
