St. Lawrence River – Iroquois control dam navigational gates open for recreational passage

Cornwall – Ontario Power Generation (OPG) advises St. Lawrence River users that the navigational gates at the Iroquois control dam have been reopened and are once again available for recreational boat passage.

OPG required temporary closure of the gates at the Iroquois control dam to mitigate excessive high flows downstream where the Ottawa River drains into the St. Lawrence River. Current conditions allow for the gates to be raised. These gates allocated for recreational use must be navigated with extreme caution at all times.

This notification is in accordance with the operating regulations of the International Lake Ontario - St. Lawrence River Board.

OPG reminds all users of the river to take every precaution and obey all signage around dams and generating stations. To learn more about water safety, please visit opg.com/watersafety.

About OPG

As one of North America's largest, most diverse electricity generators, OPG invests in local economies and employs thousands of people across Ontario and the US. OPG and its family of companies are leading the development of new clean technologies, refurbishment of existing assets, and electrification initiatives to power the growing demand of a clean economy for decades to come. Learn more about how the company is advancing these initiatives while prioritizing people, partnerships, and strong communities by reading OPG's [Climate Change Plan](#), [Reconciliation Action Plan](#), and [Equity, Diversity, and Inclusion \(ED&I\) strategy](#).
